Course Description
This course covers general principles of Microeconomics. We ask such questions as: How to decide between continuing study or going to work? Why does the price of gasoline change much more frequently than the price of bread? Which party gains, and which party suffers from trade tariffs, etc. It is designed to introduce the students to learn the basic concepts and methods of microeconomics—the study of how individuals make decisions and interact in markets, under conditions of perfect and imperfect competition. By the end of the course, students will be able to understand the introductory microeconomic theory, solve fundamental microeconomic problems, and use these techniques to think about some policy questions relevant to the operation of the real economy.

Grades
The final course grade will be based upon homework assignments and exams given throughout the course.

Homework Assessment
Homework assignments are designed to help you learn how to apply the material presented in lectures. You are permitted to discuss course material, including homework, with other students in the class. However, you must turn in your solutions to each homework. Discussion with others is intended to clarify ideas, concepts, and technical questions, not to derive group homework solutions. Late assignments will not be accepted for any reasons. Solutions to the homework will be discussed in class.

Examinations
Examinations are based on lecture notes and assigned chapters. Exams are not cumulative, but most of the concepts in this class are interrelated. A make-up exam is not guaranteed. All examination is to be taken in the classroom. Students will not be permitted to consult books or notes during the exams. All students must have their student ID cards with them at all exams and should present these on demand to the examination invigilator.

How to do well in this course?
The materials we will cover in this course are beneficial for your further economic intuition. Reading the textbook regularly and keeping up with the course is the important way to ensure a good grade. Besides, students are expected to attend all the lectures throughout the semester. Lectures will help students focus better on material relevant for preparing homework and exams. Finally, the best way to learn the abstract concepts is to do practice problems.

“Apply the Concept” Essay
Economics is a social science, and the study of which is related to a wide range of fields all over the world. Please use what you have learnt in this course to analyze anything happened around you or happened worldwide. In the first paragraph, you can state in your own words the economic theory, or theories to be applied. In the second paragraph, you can state briefly the event you are going to analyze, and why you picked this event. In the third paragraph, you can give some comments, suggestions for improvements of the event if necessary. After finishing the essay, please write briefly under your third paragraph about your understanding of Economics at the beginning and end of the semester respectively. Try to write between 300 and 400 words.
