Tentative Course Outline

You are responsible for the material covered in any sections of the manuscript mentioned in the outline.

I strongly recommend that you make sure you are familiar with the material in the non-starred sections of chapters 1-2, 4-5, and 8 of the manuscript. Much of this should be familiar from Fundamentals Micro, and a bit of it appeared in Math Methods.

The table lists the closest corresponding chapter in Mas-Colell, Whinston, and Green (MWG). In some cases, the correspondence is not very close. We will not cover all of the material in the manuscript. I will occasionally update the list to reflect material actually covered.
