**Course Description:**

The Intermediate Microeconomics course is the first upper level course that is intended to expand students’ knowledge of microeconomic concepts, models, and theories. This course focuses on topics of:

- Consumer theory
- Cost and production theory
- Market structures, optimization, and equilibrium theory

**Course Objective**

An objective of this course is for students to further develop their understanding of microeconomics theories and different market structures. It is also intended to enhance students’ ability to apply the theories to appreciate the role that microeconomics has in their everyday lives. Students will learn to:

- Use models to understand markets
- Assess optimization (e.g., utility maximization or cost minimization)
- Identify the characteristics of the different market structures and evaluate the outcome in each market structure, and
- Assess the impact of externalities, public goods, and government interventions

**Attendance:**

Regular class attendance is not required (this course is a fully online course). However, professor will schedule meeting times to discuss material as the semester progresses.

**Online Courtesy:**

**In Class Etiquette**

General rules are (in no particular order):

1. If attending the Zoom discussions, students need to come to class on time, and they should plan to attend for the entire session.
2. Students need to turn their cell phones and other electronic devices off prior to entering the online session.
3. As crazy as this may seem, students should **abstain from using drugs** before attending.

**Netiquette**

In all online communication, it is expected that all students will follow rules of online "netiquette". Netiquette is a set of rules for polite online behavior that all members of this class are expected to follow. Review some of the general netiquette rules, and students should answer these four questions before posting anything:
1. Is the information accurate? (provide sources when necessary)
2. Is it necessary?
3. Is the tone polite?
4. Is the information helpful to furthering the topic discussed?

If student can answer “no” to any of these questions, he/she may want to reframe from posting or emailing. Individuals who violate the netiquette policy or engage in disruptive online behaviors such as flaming (posting disrespectful or hostile comments), posting inappropriate comments, or shouting (posting messages using all capitals) may have their class access privileges revoked and/or they may be referred to the Student Dean. Students, who continue to engage in unacceptable online behavior even after being warned, may be permanently denied access to the class, which is likely to result in an “F” grade since this course uses an online portal for grading and assessing assignments.

A good rule of thumb for netiquette would be to assume your parents, grandparent, boss, and kids are reading your posts. If you think one of them would not appreciate the response/comment, assume neither would I nor your fellow students.

**Student’s Responsibility:**

- It is the student’s responsibility to know what is being covered in class.
- It is the student’s responsibility to take the exams and quizzes before the due dates.
- It the student’s responsibility to submit the assignments, including homework, on time.
- It is the student’s responsibility to know if any exams, quizzes or homework dates have changed. (consistently review the on syllabus since it changes when things change)
- It is the student’s responsibility to check and ensure that all Canvas materials are accessible to them, and he/she must inform me of any problems with sufficient time to correct or resolve any problems (i.e. at least 72 hours).
- It is the student’s responsibility to access and read Canvas for course updates.

**Required texts:**

This is the required book. I am sure there are many versions of the same book, but I do provide the ISBN for two options.

**Special Accommodations:**

As a disabled veteran, I am more than willing to assist anyone with a disability(s). However due to of confidentiality, I am not made aware of any disability any student may have.
If a student needs academic accommodations and/or disability services support, student must contact the Office of Disability Resource Center and follow the appropriate process to initiate any reasonable accommodations. It is the student responsibility to contact the Disability Resource Center to document his/her disability prior to receiving services. Student’s documentation and any related communication with the instructor will remain strictly confidential, but may be share with the Office of Disability Resource Center when obtaining guidance.

Student must notify the instructor that student has registered with the Office of Disability Resource Center and provide the instructor a copy of the its approved letter. Until the student asks for assistance at the Disability Resource Center and the Disability Resource Center contacts me (or provides a letter), I will assume all students are able to do the work without providing any accommodation. Therefore, until all necessary steps are completed, reasonable accommodations will not be provided. All accommodations are post hoc, and not retroactive.

Once registration with Disability Resource Center is complete and all appropriate documentations are provided to the professor, the professor requires 72 hours to begin changing all the setting within the online portal (such as Canvas, D2L, Blackboard, etc). On the mean time, student must assume accommodations will not be available for up to 72 hours (or three working days). The professor will begin changing the assignments or assessments with the closest due date and work chronologically to the end of the semester. The process of changing all the setting to all assessments and assignments may take up to seven (7) days to complete.

Homework or presentations assignments do not qualify for accommodation because they are a prerequisite for the student to be prepared for class participation and in class discussions (Item already discussed and cleared with the Disability Resource Center).

There are two Disability Resource Centers located at Biscayne and Maidique campuses. If you need more information, please contact me for information.

**Academic Honesty**

Your academic work must be the result of your own thought, research, or self-expression. Academic misconduct includes, but is not limited to the following: cheating, plagiarism, unacceptable collaboration, falsification of data, aiding and abetting dishonesty, unauthorized or malicious interference, hacking computer property or software, and online disturbances. Please refer to the Student Code of Conduct Policy and the Student Code of Conduct section located in the Student Handbook for more information. All required class activities are subject to submission to Turnitin.com (or similar software) for the detection of plagiarism. All submitted papers/homework assignments will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers.
Types of Academic Dishonesty:

- Cheating: Is defined as obtaining or attempting to obtain, or aiding another to obtain credit for work by dishonest or deceptive means.
- Plagiarism: The use of words or ideas of the original creator without attribution as if they were your own. Plagiarism ranges from copying someone else’s work verbatim and elaborating on or altering someone else’s work.
- Self-Plagiarism: Submitting or reusing parts of a previous paper without referencing source it was first submitted. This includes retaking a course and turning in previously submitted papers and data.
- Unacceptable Collaboration: Using answers, solutions, or ideas that are the results of collaboration without citing the fact of the collaboration is improper.
- Falsification of Data: Making up or falsifying information and data. Examples include making up or altering data for an experiment or citing reference to sources you did not actually use.
- Pay Services: Employing an assignment writing service or having another write the paper for you.
- Enabling: Aiding and abetting another student in an act of academic dishonesty. Examples include giving someone a paper to copy and allowing someone access to your account.
- Unauthorized or malicious interferences: If one person deliberately interferes with the work or activities of another person on purpose to cause the other harm or irreparable damages. Academic honesty violations are considered a breach of policy and may result in academic penalties (zero points on the assignment/test in question, and/or a failing grade for the class), disciplinary action, and/or referral to the Dean of Student Affairs.

Electronic Communication Policy for this class:

The following are my policies for electrical communication.

1. I prefer students sent communications through Canvas.
2. I will not open or read any email that is not from an FIU account.
3. I will only send email (or mass email) using Canvas.
4. I will not open attachments through email, except when submitted through Canvas.
5. Student must send email with time for me to respond, at least 72 hours.
6. I will check my Canvas emails several time during the week, but not every day. Please keep in mind that it is possible that a student may send an email minutes after I log off, and I may not log back and reply on for several days.

Key Semester Dates:

- First day of class: August 24, 2020
- Thanksgiving Holiday: November 26 – 28, 2020
- Last class: December 5, 2020
- Finals week: December 7 – 12, 2020
- Dateline for grade submission: December 16, 2020
**Zoom Meeting Date**

I will hold 30 minute zoom calls on the following Tuesdays to address predetermine topics (see Course Outline table). These calls are not required, but highly recommended. They are intended to provide a brief discussion for the material to be covered by the module section prescribed by the syllabus’s course outline.

This dates are in place assuming no inclement weather in Miami or Atlanta (hurricane or snow), or medical emergency.

**Grading Expectation:**

Many students are under the falls impression that if they miss every class, homework, and quizzes, I can help them pass or give them an incomplete. I cannot, nor will I. Others student belief a score of 40 out of 100 in every assignment and assessment is good enough to pass my course. It is not. In addition, some students are under the impression that their financial aid situation will have an impact on final grading. Lastly, some students also think that because they have always gotten an “A” or have never gotten an “F,” I am required to keep the streak. I am not required to keep the streak.

To be clear, students’ grades are only based on their academic achievements in this class, and this class only. If student wants help from me, the students most show interest in the class. The student must go to zoom session when possible, do exercises, ask intelligent questions, and ask for help well in advance (not on final’s week). If student asks for help the day before the final, there is very little I can do for student at that time.

I encourage all students to remember the following expressions for this class (and life in general):
- Always think ahead
- “Lack of planning on your part is not an emergency on my part” (anonymous)

All things aside, life happens and I will help whenever it is possible. I will send out emails as the semester progress providing guidance to the class if such event takes place.

I also provide my quiz policy on Canvas, please read it.

**Assessment Rules:**

I maintain a zero (0) tolerance policy with regards to cheating. Students caught cheating when taking the assessments will receive grade of “F=0” for the quiz, test, or homework on the first offence. Repeat offenders will be required to sign an informal resolution which will be filed with the Dean’s office for further disciplinary actions. If student have any questions, read the student’s manual.

I have caught students cheating in class and on online… please don’t do it!

**Class Breakdown and Grade Weights:**

1. Exams 30% (10% each)
2. Quizzes 45% (average from the 12 quizzes)
3. Homework 25%

**Quizzes and Exams**

All quizzes and exams are available in online (Canvas, D2L, Blackboard, etc). All quizzes and exams are due immediately after the chapter is covered in class. However, all quizzes will remain open for approximately one week after the material is discussed.

*Students can still take the quizzes until the close date without any negative impact.*

Exams are due immediately after the last chapter cover by the examination, and will remain open until the explicit closing date. As with quizzes, students can still take the examinations until they the close date without any negative impact.

*Once an exam or quiz is closed, students will not be able to take the quiz or exam.*

The quizzes will have approximately 10 questions each. Exams will have between four (4) to five (5) questions per chapter covered (e.g., 4 chapters covered would have approximately 20 questions). I highly recommend that all students take the quizzes seriously. The student should read the chapters and should complete their homework problems before taking the quizzes. There will be one quiz for each chapter and three module exams. That means students should have completed 12 quizzes and three exams by the end of the semester.
All quizzes and exams will be opened on the first day of school (August 24, 2019)

Homework

The chapter assignments are due the same date as listed below (see Course Schedule table).

Homework assignment Due Dates

</tbody>
</table>

This dates are in place assuming no inclement weather in Miami or Atlanta (hurricane or snow), or medical emergency.
Homework assignments will consist of approximately two questions from the “Problem” section at the end of each chapter. In order to obtain credit, student must:

1. Submit a assignment on the online portal (Canvas)
2. Submit work on the due date (no late work will be accepted for HW grade).
3. Show all the steps to obtain the correct results (copying the question and final answer will not due).
4. Submit in MS Word or PDF format.

If mathematical or logical steps are not shown, no grade will be given. If student is sloppy in his/her writing, I will deduct up to, but not more than, 50% of the submitted homework.

**Extra Credit:**

I will *not* give extra credit assignments. There will be no exceptions. Student should not ask. I will assume the student did not read the syllabus if they ask.

**Curve**

Curves may be administered at the end of the semester, if professor deem them necessary. Curves are highly unlikely. Curves are mainly given when a system or professor error occurred that impacts class participants, and not because of students’ underperformance.

**Make-up Policy:**

*No* make-ups will be administered after the quiz or exam close date. All quizzes and test are posted online and are available for several days, if not months for student to complete. Please do not ask me, I will not do it.

An outpatient procedure or a cold the day of an exam is not a legitimate excuse for missing any assessment that is available weeks or months in advance. Assessments (quizzes/exams) are schedule for multiple days including the weekend and class time and they can be taken from anywhere since they are on online. If you schedule a medical procedure on the day of an exam, you need to take the exam on the day/night prior. This paragraph is trying to illustrate to all students to plan ahead because I have set up all assessments to be available for multiple days to eliminate any possible excuses.

**Syllabus is a “Live” Document**

Please recall that this syllabus is a live document and things may change in the course of the semester as I, the professor, deem necessary. Any changes we agree to during class will require a change to the syllabus to become formal. If there is no change to the syllabus, there is no change. This is why it is important that you check the syllabus every so often (e.g., once a week or once every other week).

**Final Class Grade Scale:**

When computing the final class grade, the following standard will be used.
<table>
<thead>
<tr>
<th>Grade</th>
<th>Score Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>100 – 94</td>
</tr>
<tr>
<td>A –</td>
<td>93.9 – 88</td>
</tr>
<tr>
<td>B +</td>
<td>87.9 – 84</td>
</tr>
<tr>
<td>B</td>
<td>83.9 – 79</td>
</tr>
<tr>
<td>B –</td>
<td>78.9 – 75</td>
</tr>
<tr>
<td>C +</td>
<td>74.9 – 73</td>
</tr>
<tr>
<td>C</td>
<td>72.9 – 68</td>
</tr>
<tr>
<td>D</td>
<td>67.9 – 60</td>
</tr>
<tr>
<td>F</td>
<td>59.9 – 0</td>
</tr>
</tbody>
</table>
